

## Welcome to StoneRox

Welcome to StoneRox

StoneRox is a thin veneer Canadian Made Facing stone product by Architectural Accents Inc. produced in Stouffville, Ontario. It is lightweight and installer friendly, used in both residential and commercial applications. StoneRox can also create distinctive interior features, as the stones are 1" to 2" thick.

As a manufactured exterior building stone product, StoneRox offers the Canadian marketplace with a choice, whether for new construction or renovations where no structural footings are available. Classic exteriors can be achieved with this architectural stone product, as StoneRox can be combined with brick, wood or stucco.

Landscape projects are simple and affordable with StoneRox; any style of outdoor living can be achieved to create lasting impressions and relaxing environments.

Interior stone applications such as feature walls and fireplaces are easy to create with StoneRox as this manufactured stone product can be applied over most sound surfaces.
