

About us

Corporate Vision

Architectural Accents' vision is to continue to expand our role as a leader in reconstructed stone and architectural surrounds through innovation in manufacturing technologies.

We will continue to build relationships within the construction industry, with our clients and employees, based on pride, trust and confidence.

We are dedicated to maintaining an environment conducive to fostering partnerships in the industry.

Mission Statement

Architectural Accents Inc. manufactures StoneRox.

We are committed to offering the highest quality reconstructed stone in the marketplace.

Through unique selection of colours and textures, Architectural Accents aims to bring quality to our clients, through our high performing team of dedicated employees. Our team of professionals is committed to excellence and client satisfaction enabling us to establish a leading position in the marketplace.

History

"StoneRox came to market based on requests and encouragement from our builder clients, who are consistently looking for innovative products and unique looks", said Mike Grace, President and owner of Architectural Accents Inc. "We have researched the facing stone market and believe that with the improvements we have made, we will meet the needs of the Canadian Market by offering a facing stone made here for our climate."

Architectural Accents Inc., is a sister company to Wintergreen Ltd., who has already provided manufactured stone for twenty years with the Bradstone Trademarked products.

Their reputation for quality products and service in the marketplace is unparalleled.

Mike Grace has earned a reputation for high standards by offering not only innovative products and colours but also

through the service both companies' offer.

As a testament to his ethics and industry involvement the Greater Toronto Home Builders Association-UDI awarded Mike the 'Member of the Year Award' in January 2007 for his contributions.

As privately held businesses, amazing products, impeccable service, support and design recommendations are achieved based on relationships with clients and suppliers alike.
