

Technical Info. and Specifications

Technical

StoneRox is a manufactured stone to replicate the look of natural stone. StoneRox is made with lightweight aggregate, Portland cement, coloured pigments and a variety of admixtures. StoneRox can be applied to most surfaces and does not require a foundation. Please refer to the install guides for detailed information.

Specifications

In accordance with CSA Standards, exceeds #A165 Series Type I-35

Minimum Compressive Strength: 35 MPa (5000 PSI) at 28 days

Water Absorption: Less than 15%

Fire Rating: Zero Flame Spread

Weight: 8-10 lbs/ft² (using light weight aggregate)

Density: Less than 1700 kg/m³
