

## Installers

Depending on the application, StoneRox can be a do-it yourself project. However, a qualified installer will have the ability to complete your project much quicker and more efficiently.

Before deciding who is best suited for your project, it is always suggested that you obtain two to three quotes and references from your contractor. Properly researching your options will allow you to establish a good relationship with your mason and ensure the success of your project.

To obtain information on qualified installers/masons, please refer to your local dealer for assistance or contact StoneRox at 1-866-798-7809 or by email to [info@stonerox.ca](mailto:info@stonerox.ca)
